IndyGo Bike Rack

How to Load Bike

1. **Alert the driver:** Make sure the bus stops completely and the operator acknowledges that you plan to load your bike.
2. **Lower the rack:** Squeeze the handle at the top of the rack and pull it down to lower the rack into the horizontal position. If not already down.
3. **Load the bike:** Place your bike into one of the two spaces, with the front wheel in the wheel slot.
4. **Secure the wheel:** Pull the support arm over the front wheel to secure it in place. The support arm should rest on the wheel, not the frame.
5. **Board the bus:** Enter the front of the bus, pay your fare, and find a seat.

How to Unload Bike

1. **Notify the driver:** Before you exit, inform the bus driver that you will be removing your bike.
2. **Exit the front door:** Go to the front of the bus and exit through the front door.
3. **Lift the arm:** Raise the support arm off the front wheel and return it to its original position.
4. **Remove the bike:** Lift your bike straight up and out of the rack.
5. **Stow the rack:** If the rack is empty after you remove your bike, fold it back to the upright position.
